*******IMPORTANT NEWS**************

GSIL like all organizations are having to look at how we provide services and make the necessary changes in order to follow CDC guidelines and recommendations for maintaining social distancing and good practices. So, during this turmoil and period of uncertainty of the COVID19, GSIL will no longer be providing Non-Medical transportation for consumers. This service is a non-essential task and, in an effort to keep everyone safe, we have made this decision to go into effect starting 4/18/2020.

This does not mean that an ACE can’t do grocery shopping or pharmacy pickups. It just means the ACE will not be providing transportation for consumers. If a consumer is in the car that practice is not social distancing, and if you and ACE are both out an about for non-essential errands then that is not following the stay at home order.

This virus has affected every aspect of what life was and should be. Unfortunately, due to the severity of it’s nature, business, states, countries, and each individual has had to make some hard decisions and changes in order to beat this virus and come out the other side.

Please note as soon as we can lift this we will and consumers will have this service back. In the meantime, please make sure everyone is practicing good hygiene and social distancing. If during personal care or other times throughout the day social distancing isn’t an option then please wear a mask, bandana, kerchief or other creative barrier that can help prevent the spread.

Stay strong, because things will get better. It might be stormy now, but it can’t rain forever.

We will all get through this....
